ka-Map Workshop

Tuesday 12 Sep 2006 at 14:00 (03h30')

As co-developers of ka-Map me, Lorenzo Becchi, and Andrea Cappugi would like to present some special implementations of ka-Map. The WFS client and some other interaction with GML can be presented. Tooltip features too. Maybe some other special features will be developed from now to september.

At the moment we are presenting independently from DM Solutions but we are trying to concert a common presentation with Paul Spencer (ka-Map project manager). We are available for requests, ka-Map presentations and collaboration with other relators.

- * project overview (what is ka-Map, maptools site, downloads, wiki, bugzilla and a quick demo)
- * installation (we can probably assume windows/ms4w?)
- * configuration (config.php settings and how they affect ka-Map)
- * map file considerations (grouping, metadata)
- * using the default interface (changing map files)
- * using the API in your own interface
- * adding overlays
- * ka-Map extras (WFS, tooltips, GML)
- * Q&A

Primary authors : Mr. BECCHI, Lorenzo (Ominiverdi.org) ; SPENCER, Paul (DM Solutions Group)

Co-authors :

Presenter : Mr. BECCHI, Lorenzo (Ominiverdi.org) ; Mr. CAPPUGI, Andrea (Ominiverdi.org)

Session classification : Workshop Session 7

Track classification : [WKS] Workshop

Type : Workshop
