The Application of MapServer/MapScript to Map and Depict Murals in the City of Winnipeg

Wednesday 13 Sep 2006 at 13:30 (03h30')

This presentation will demonstrate a MapServer/MapScript web mapping application that allows users to explore the murals of Winnipeg. Winnipeg, Manitoba is a city with a rich collection of murals and the developers of this website wanted to create a mapping interface that would allow people to easily locate murals in the city and view them. The mapping interface allows people to quickly view the murals in an area and select individual murals in order to view information about them and larger photos of them. This demonstration will explore all of the functionality of the murals mapping interface.
