Contribution ID : 60

Advanced features in CartoWeb

Tuesday 12 Sep 2006 at 14:00 (03h30')

CartoWeb (<http://www.cartoweb.org>) is both a comprehensive and ready-to-use Web-GIS and a convenient framework for building customized applications. It is based on Mapserver.

In this workshop, we'll assume some familiarity with the architecture and configuration of CartoWeb and directly go to some advanced features:

- Making layers editable
- Using routing module (Pgdiijkstra)
- Adding new functionalities: step by step minimal plugin writing

To attend this workshop, a basic working knowledge of CartoWeb and PHP5 OO is a pre-requisite.

Primary authors : Mr. COURTIN, Olivier (Camptocamp)

Co-authors : Mr. JUNOD, Frédéric (camptocamp) ; Mr. BOLOGNINI, Yves (Camptocamp SA)

Presenter : Mr. COURTIN, Olivier (Camptocamp) ; Mr. JUNOD, Frédéric (camptocamp) ; Mr. BOLOGNINI, Yves (Camptocamp SA)

Session classification : Workshop Session 4

Track classification : [WKS] Workshop

Type : Workshop
