GRASS goes web: PyWPS

Friday 15 Sep 2006 at 09:00 (00h30')

OGC's Web Processing Service draft paper 05-007r4 is defining the way, geoprocessing operations should be offered over networks using Web Services. This paper introduce one of this implemetation. The target of PyWPS (Python Web Processing Service) is to offer GIS tools over web interface. PyWPS offers the user environment for writing own parts of WPS - Processes, bringing funktionality of GIS GRASS and other geoprocessing tools should be as easy as possible.
